Education

B.S in Computer Science

East Texas A&M University

Commerce, TX, USA 05/2026

- GPA: 3.6/4.0(Deans List)

Experience

Service Desk Analyst

Brinker International

Coppell, TX, USA 02/2026 - Present

- Provide first-level technical support to restaurant locations and corporate users, troubleshooting hardware, software, network, POS, and operational technology issues.
- Diagnose and resolve technical incidents through ServiceNow, documenting troubleshooting steps, resolutions, and escalations to maintain accurate incident records.
- Troubleshoot and support POS systems, KDS devices, tablets, printers, payment devices, and other restaurant technology.
- Utilize enterprise technologies including Oracle, MenuLink, CFC Aloha POS, Olo, Cisco Meraki, Jamf Pro, iTrak360, and EloView to troubleshoot and resolve technical issues.
- Coordinate with third-party vendors and field technicians to troubleshoot equipment failures, manage hardware replacements, and track incidents through resolution.
- Communicate technical solutions clearly to restaurant management and corporate users while providing step-by-step troubleshooting and support.

Insurance Assistant

Texas Edge Insurance Agency

Arlington, TX, USA 04/2022 - 04/2024

- Managed insurance policies across multiple carriers while maintaining accuracy and compliance.
- Coordinated with providers and clients to process policy updates, signings, and cancellations while securely handling confidential information.

Projects

HealthMate | Dart, Flutter, AI, Geolocation

- Developed a health management application integrating fitness, dietary, mental wellness, and preventive health features.
- Developed an AI-powered chatbot providing general health information, minor ailment guidance, and preventive care recommendations.
- Implemented geolocation functionality to help users find nearby hospitals, clinics, and pharmacies.
- Analyzed user data to identify trends in reported symptoms and health concerns and improve personalized application insights.

Secure PII Collector | AWS, API Gateway, Lambda, CloudFront, DynamoDB

- Developed a secure cloud application for collecting and protecting personally identifiable information using AWS services
- Implemented API Gateway, CloudFront, and Lambda with HMAC authentication, request validation, and data protection.
- Configured API throttling and security controls to improve application security and reliability.
